

Luong Chi Trung

– Fresher AI Engineer –

(+84)91-123-7719 | luongchitruong.work@gmail.com | linkedin.com/in/luongchitruong | github.com/truni46

EDUCATION

Ton Duc Thang University

Bachelor in Computer Science (GPA: 8.5/10)

IELTS: 6.0

Ho Chi Minh, Vietnam

Sep 2022 – May 2026

EXPERIENCE

Fresher AI Engineer

VTC Telecom

Nov 2025 – May 2026

Vuon Lai Ward, Ho Chi Minh City

- Deployed an internal enterprise knowledge repository to support AI integration into inventory management, document review, and operational auditing workflows.
- Developed a customer support chatbot to assist the service team in handling customer requests and accelerating response decision-making for nearly 200 aircraft under the VNA IFC project.
- Orchestrated an AI Agent-based workflow for the R&D department, enabling automated research, planning, testing, and report generation.

Fresher AI Researcher

AIAI Research Laboratory

Mar 2024 – Apr 2026

Tan Phong Ward, Ho Chi Minh City

- Published two Scopus-indexed International Conference papers in the field of Time Series Forecasting.
- Investigated emerging applications of graph learning methods for Traffic Forecasting.
- Benchmarked baseline models and constructed new datasets for Traffic Forecasting and Sequential Recommendation.

PROJECTS

DeepMory

Jan 2026 – May 2026

- Description: Architected an enterprise-grade internal knowledge management system to centralize organizational documents and enable retrieval-augmented search, accelerating information access and task execution.
- Responsibilities:
 - * Engineered an Agentic RAG-based system with enhanced short-term and long-term memory management modules, improving retrieval performance and reducing average search latency from 5 seconds to under 3 seconds.
 - * Integrated PaddleOCR-VL-0.9B to digitize handwritten documents and photographed contracts, enriching the enterprise knowledge base with structured and searchable information.
- Skills: Python, LangChain, LangGraph, Agentic RAG

TECHNICAL SKILLS

Languages: Python, Java, C

Databases: MySQL, PostgreSQL, Qdrant

Frameworks: Pytorch, Tensorflow, LangChain, LangGraph, Flask, FastAPI

Developer Tools: Git, GitHub Actions, Docker, n8n, Ollama, Unsloth, Claude, AWS, GCP
